THE REPLY FILED 19 December 2011 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE.						
1. The reply was filed after a final rejection, but prior to or on the same day as filing a Notice of Appeal. To avoid abandonment of this application, applicant must timely file one of the following replies: (1) an amendment, affidavit, or other evidence, which places the application in condition for allowance; (2) a Notice of Appeal (with appeal fee) in compliance with 37 CFR 41.31; or (3) a Request for Continued Examination (RCE) in compliance with 37 CFR 1.114. The reply must be filed within one of the following time periods:						
a) The period for reply expires <u>3 months from the mailing date of the final rejection.</u>						
b) The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection. Examiner Note: If box 1 is checked, check either box (a) or (b). ONLY CHECK BOX (b) WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f).						
Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). NOTICE OF APPEAL						
2. The Notice of Appeal was filed on 19 December 2011. A brief in compliance with 37 CFR 41.37 must be filed within two months of the date of filing the Notice of Appeal (37 CFR 41.37(a)), or any extension thereof (37 CFR 41.37(e)), to avoid dismissal of the appeal. Since a Notice of Appeal has been filed, any reply must be filed within the time period set forth in 37 CFR 41.37(a). AMENDMENTS

6. Newly proposed or amended claim(s) would be allowable if submitted in a separate, timely filed amendment canceling the non-allowable claim(s).						
7. The proposed amendment(s): a) will not be entered, or b) will be entered and an explanation of how the new or amended claims would be rejected is provided below or appended. The status of the claim(s) is (or will be) as follows:

Continuation of 11. does NOT place the application in condition for allowance because: Applicants remarks are identical to the remarks filed in paper dated 5/9/2011 and have already been addressed by the Examiner (see Final dated 6/17/2011).

Applicants do not point the specification to support the claim language "and, after removal of the mobile radio communications network terminal from the storage device and the attendant renewed actuation of the switch element, the switchover function is canceled again via the service telephone number triggered thereby" (paper dated 5/9/2011 page 8 - page 9). Instead, simply state that the focus of the analysis with respect to the prior art must be on the claims, and particularly, the plain language of the claims (paper dated 12/19/2011 top of page 8).

The Examiner notes that Applicants specification does not require both cradle and the attendant renewed actuation of the switch element. Instead, the specification teaches the cradle having a switch element in the storage depression, which is triggered by the mobile phone being placed into the storage depression (see Pub. No.: US 2008/0167023 at paragraph 0032) or an additional, manually switch may be used (see Pub. No.: US 2008/0167023 at paragraph 0081).

Furthermore, Bosik also teaches the cradle has a programmable module/unit that is programmed by the subscriber via manually (col. 5 lines 27-44) pressing buttons (col. 6 lines 4-9).
